

Version history and Trash

Every note keeps a version history for 30 days. Open a note, choose More > Version history, and select an older version to restore it.

Deleted notes and notebooks move to Trash. You can restore them from Trash within 30 days. After 30 days they are removed permanently.

Sharing and permissions

You can share a notebook with people inside or outside your team. Choose Share, enter an email address, and pick Viewer or Editor.

Only the notebook owner can change permissions or remove people.

Offline mode

The desktop and mobile apps work offline. Changes are saved on the device and sync when the connection returns.

If the same note was edited on two devices while offline, AcmeSync keeps both versions and marks the note as a conflict.
